APPOINTMENT OF FILM THIS!
AS AUTHORIZED AGENT AND REPRESENTATIVE

I certify that I am a representative of Tuff Contender (Principal) and am authorized to enter into binding contractual agreements on Principal's behalf provided Principal has pre-approved such agreements. I further certify that I am authorized by Principal to appoint other representatives and agents for Principal and to give such representatives and agents authority to enter into and bind Principal to agreements relating to the issuance and compliance with location film (e.g. theatrical, television, commercial, and other motion picture filming) and still photographic permits, including the permits themselves and any riders to such permits. Acting on the behalf of Principal in my capacity as its authorized representative, I appoint FILM THIS! and its employees and agents as Principal's authorized representatives and agents to apply for and receive location film (e.g. theatrical, television, commercial, and other motion picture filming) and still photographic permits on behalf of Principal through FilmLA for any city, county or other jurisdiction that FilmLA contracts with, in accordance with Principal's instructions, to negotiate, discuss, accept, modify, agree to bind the Principal to the terms and conditions of such permits (including any restrictions and/or community guidelines applicable to any such permit) and to execute such permits on behalf of Principal. Principal understands, acknowledges and agrees that it (and/or it's insurer) remains responsible and liable for any and all obligations imposed by or incidental to any permit or rider issued to Principal signed by an employee or agent of (including any coordinator, runner or messenger used by) FILM THIS!. Principal further agrees to comply with the terms and conditions of any such permits and hereby appoints FILM THIS! as an authorized representative to facilitate compliance with such terms and conditions following issuance of such permits and to enter into agreements for Principal with respect thereto. Any person, city, agency, entity or organization (including FilmLA and any city, county or other jurisdiction that FilmLA contracts with) may rely on this appointment and not need obtain any further authorization for any act described herein. An original or electronic copy of this appointment shall be sufficient and may be treated as an original for all purposes. The appointment may be revoked by Principal at any time in writing delivered to FilmLA, but in any case shall expire one (1) year from the date of execution set forth below.

I declare under penalty of perjury under the laws of the State of California that I am authorized to appoint FILM THIS! as an agent for Principal and based on that authority I hereby appoint FILM THIS! as Principal's agent as set forth herein.

NOT A PERMIT

Los Angeles County Drainage Area (LACDA)

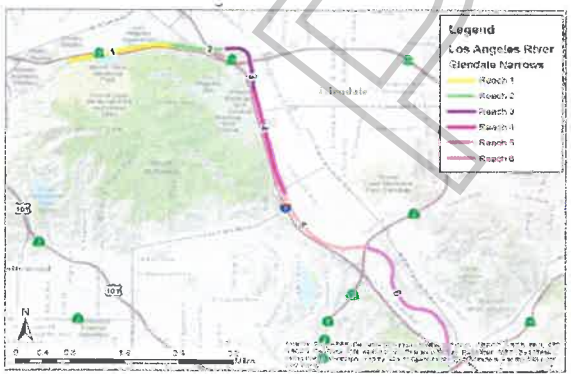
LACDA projects include 5 dams, 1 debris basin, and 45 miles of levee and channel. These projects reduce the risk of flooding for critical infrastructure, transportation corridors, residences, and businesses within Los Angeles County.

Los Angeles River Active Projects

Temporary Barriers

The temporary barriers were strategically placed to protect areas adjacent to portions of the Glendale Narrows section of the Los Angeles River which are at greatest risk of having flood waters overtop the levee walls.

Due to the reduced ability of the channel to contain flood waters and the limited funding available to the Corps to remove and replace the temporary barriers, portions of the originally installed barrier along the east embankment will remain in place as a public safety measure for the time being.



Non-Native Vegetation Management

October 2016 - March 2017

This management initiative includes the removal of non-native vegetation, large pieces of concrete debris, and trash from the Glendale Narrows Section of the Los Angeles River Flood Control Channel. This includes 12.5 acres in Reach 2A (already completed), 5.5 acres in Reach 5C, 24.4 acres in Reach 6A, and 18.9 acres in Reach 6B.

Any identified non-native invasive vegetation within these areas will be treated. Treatment consists of hand cutting the non-native invasive species followed by hand application of herbicide with monthly follow-up applications.

Los Angeles River Upcoming Projects

Reach 4D Channel Embankment & Levee Repair

Scheduled for April – October 2017

Maintenance of damaged channel and levee structures within Reach 4D of the Los Angeles River Flood Control Channel will be completed. The work will take place inside of the Los Angeles River approximately 300 feet North of Los Feliz Blvd. The bike path on the West side of the river will remain open. Approximately 1,700 feet of the levee crest, on the East side of the river, adjacent to the golf course, will be closed during construction. The repairs are necessary to restore the integrity of the levee and channel structure and to ensure they function as designed in a storm event.

Reach 5C Sediment Testing

Scheduled for January – March 2017

An analysis will be performed to determine the physical and chemical characterization of soil in Reach 5C. The soil will be tested for naturally occurring as well as human-made contaminants. This soil is tentatively scheduled for removed in FY18 remedy the reduced flow capacity caused by sedimentation in the channel.

Los Angeles River Tentative FY18 Projects

Additional Non-Native Vegetation Management

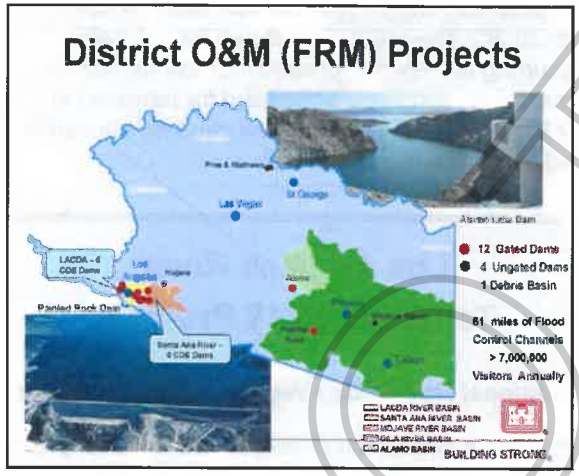
Non-native vegetation management for fiscal year 2018 includes removal of approximately 7.23 acres of non-native vegetation in Reach 4A, 6.32 acres in Reach 4B, 11 acres in Reach 4C, 6.43 acres in Reach 4D, 13.2 acres in Reach 5A, 16 acres in Reach 5B, and 13.8 acres in Reach 6C.

Sediment Removal

Sediment will be removed from Reach 5C of the Los Angeles Flood Control Channel. Sedimentation has led to diminished channel capacity resulting in an increased flood hazard. This removal is necessary to ensure that the channel conveys flows during a storm event and provides adequate flood protection.

DRAFT

Operations Branch



The Operations Branch is responsible for the operation and maintenance of flood risk management projects, including 15 dams and 61 miles of levee and channel across Arizona, Nevada, and Southern California. These projects reduce the risk of flooding for critical infrastructure, transportation corridors, residences, and businesses. As part of our responsibility in managing these dams, the Corps has a comprehensive Dam Safety Program that has public safety as its primary objective.
